

11th International Workshop on Micropiles
October 3-6, 2012
Milan, Italy

The International Society for Micropiles (ISM), now in alliance with DFI and ASDC, will host its 11th workshop on the subject of micropiles. The 3-day technical program will include presentations on all aspects of micropile technology worldwide, including advancements in materials and materials, design and construction methods, innovative case histories, and research and development. The event will also include a half day trip to visit the equipment exhibition at GeoFluid 2012 in Piacenza, Italy. As in past workshops, a full social program for delegates and companions is planned. Abstracts are currently being sought for inclusion in the workshop program with a submission deadline of February 28, 2012.
