CALL FOR VOLUNTEERS

NCCCO and ADSC PLAN FOUNDATION DRILL RIG OPERATOR CERTIFICATION PROGRAM

The National Commission for the Certification of Crane Operators (NCCCO), in collaboration with the International Association of Foundation Drilling (ADSC), is planning to expand its growing portfolio of certification programs with the addition of a program: foundation drill rig operator. It is envisioned that development work for this new program will begin in Spring 2017, with a program launch in mid-2018.

An opportunity exists for qualified individuals to participate in these development activities as a member of the **Foundation Drill Rig Operator Task Force**. The Task Force will guide the development of this certification program. Task Force applicants must be able to demonstrate significant expertise in the subject area, and devote sufficient time and resources to attending several (approximately eight) in-person meetings during the anticipated 16-month development timeframe.

If you feel you may meet the requirements for participation for this important project, please complete the attached Application Form and email it back to NCCCO's Director of Certification Program Development, Denny Smith, at dsmith@nccco.org or send via fax at 703-560-2392 as soon as possible. Your application will be reviewed by the Task Force chairman and you will be contacted shortly.

The inaugural meeting of the Foundation Drill Rig Operator Task Force will be held April 24 – 25 in Dallas, TX. Additional information will follow once applications are submitted.

Sincerely
Denny Smith
Denny Smith, Ph.D.
